SUMMARY

Computer Science undergraduate with strong foundations in data structures, algorithms, and artificial intelligence. Experienced in developing intelligent systems and conducting applied research, including computer vision-based detection models and real-world software solutions.

TECHNICAL SKILLS

- **Languages:** C, Java, Python, JavaScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MongoDB, MySQL
- **AI / CV:** YOLOv8, OpenCV, Computer Vision
- **Tools:** Git, GitHub, VS Code, Figma, Unity 3D
- **Core CS:** DSA, OOP, DBMS, OS

PROJECTS

Military Tank Detection Using YOLOv8 and Satellite Imagery *Jun 2025 – Aug 2025*

Tools: YOLOv8, Python, OpenCV, Remote Sensing Imagery

- Designed and evaluated a YOLOv8-based object detection model for military vehicle recognition using satellite imagery with 85%+ accuracy.
- Manually annotated **1,200+ satellite images** and created custom train-validation-test datasets.
- Improved detection robustness across varying terrain and lighting conditions, reducing false positives by **30%**.
- Achieved real-time inference performance of **20 FPS** for efficient large-scale image analysis.

BudgetBuddy – Personal Expense Tracker

Dec 2024 – Jan 2025

Tools: React.js, Node.js, Express.js, MongoDB, Chart.js

- Developed a full-stack finance tracker to manage **500+ income and expense records**.
- Implemented secure authentication and CRUD operations enabling **100% digital transaction tracking**.
- Built interactive dashboards to visualize spending patterns, improving budget insights by **40%**.
- Generated monthly summaries and analytics that helped users reduce unnecessary expenses by **25%**.

Voice AI Copilot for Smart Assistance

Aug 2025 – Oct 2025

Tools: Python, SpeechRecognition, OpenAI API, Flask

- Developed a voice-enabled AI assistant to automate tasks such as scheduling, queries, and reminders.
- Integrated speech-to-text and text-to-speech pipelines achieving **90%+ voice recognition accuracy**.
- Reduced manual task execution time by **40%** through automated voice commands.
- Designed a scalable backend to handle **100+ real-time voice requests** per session.

CERTIFICATIONS

ICIRCA 2025 – Paper Presentation

AICTE – AI-ML Virtual Internship

Cisco – Programming Essentials in C++

Cisco – Introduction to Cybersecurity

Infosys – JVM Languages

AICTE – Data Engineering Virtual Internship

Cisco – Python Essentials 1

Infosys – HTML and CSS

ACHIEVEMENTS

Successfully developed and deployed multiple real-world software and AI projects, demonstrating strong academic foundation across core computer science subjects.
